JERIC R. TABIRARA

AI-Native Full-Stack Developer | Project Manager
tabirara.jeric@gmail.com | 0920 583 1809 | Daet, Camarines Norte | github.com/jerickunn

SUMMARY

AI-native full-stack developer who designs, builds, and ships production systems for real clients. Works LLM-first, pairing with Claude Code and spec-driven workflows to move from requirements to deployed system at high velocity, while personally owning architecture, code review, and QA. Builds with React.js, React Native, FastAPI, Node.js/Express, and Laravel, backed by PostgreSQL, MySQL, and MongoDB. Leads teams from architecture through deployment.

CLIENT PROJECTS

Kuya J's Inasal | Cloud POS System *Project Manager & System Architect, 2025 to 2026*
React 18 · Node.js / Express.js · MongoDB Atlas · REST API · JWT

- Led a 7-member team to deliver a cloud-native POS syncing sales and inventory in real time, achieving 25% faster order processing and 100% stock accuracy.
- Built menu, inventory, sales reporting, voided-order handling, and audit logging behind 3-tier RBAC with JWT auth; designed the IEEE 1016 architecture and made all stack decisions.
- Coordinated UAT with live client staff, meeting every ISO/IEC 25010 criterion and replacing 100% of manual paper processes at go-live.

SmartBigasan | Rice Retail Management System *Lead Developer & System Architect, 2025*
React.js · Laravel / PHP · MySQL · PayMongo (GCash) · Leaflet.js · Chart.js · JWT

- Architected a full-stack platform for Philippine bigasan micro-retailers with per-kilo and per-sack online ordering, GCash payments, and pin-based delivery tracking on an interactive Leaflet map.
- Built a gross-to-net profit analytics engine with COGS-based computation, Chart.js dashboards, and low-stock alerts, replacing notebook bookkeeping with role-based business intelligence.

AquaManage | Water Station Operations System *Full-Stack Developer, 2025*
React.js · Node.js / Express.js · MongoDB Atlas

- Delivered a six-module operations platform covering gallon monitoring and returns, recurring delivery reminders, employee attendance, costing records, complaint handling, and analytics, replacing paper logs across the entire station.

AirconHub | Booking & Dispatch System *Full-Stack Developer, 2025*
React.js · Node.js / Express.js · MySQL · REST API

- Built a booking and dispatch dashboard for an HVAC provider covering technician assignment, appointment scheduling, client service history, and real-time team performance, eliminating double-booked schedules and streamlining invoicing.

ACADEMIC & PERSONAL PROJECTS

HYDRA | Blockchain Budget Allocation Platform *Full-Stack & Smart Contract Developer, 2025*
React.js · Node.js · Solidity · Web3 · MySQL

- Built a decentralized budgeting system for the Mabini Colleges Computer Science Department using Solidity smart contracts for immutable fund allocation, reaching 100% allocation transparency and 40% less administrative overhead.

eVote | Electronic Voting System *Solo Developer, 2024*
React.js · Python / FastAPI · SQLite

- Built voter authentication, ballot management, and real-time tallying with one-vote-per-user enforcement, plus an admin dashboard with live vote visualization that removed manual counting and tally error.

ClinicCare | Patient Scheduling & Records System *Solo Developer, 2024*
React.js · FastAPI · MySQL

- Developed patient registration, doctor schedule management, and calendar-based appointment booking with role-based views, backed by a relational schema for records, availability slots, and appointment history.

TECHNICAL SKILLS

AI Development	Claude Code • LLM-assisted development • Prompt engineering • Spec-driven workflows (CLAUDE.md, PLAN.md) • AI-integrated IDEs • Anthropic / OpenAI API integration
Frontend & Mobile	React.js • React Native • Expo EAS Build • Vite • Tailwind CSS • Chart.js • Leaflet.js
Backend	FastAPI (Python) • Node.js / Express.js • Laravel / PHP • REST API • JWT Auth
Database	PostgreSQL • MySQL • MongoDB Atlas • SQLite • Mongoose ODM
Web3 & DevOps	Solidity • Smart Contracts • Web3.js • Git / GitHub Actions • Railway • Render • Hostinger VPS
Payments & PM	PayMongo / GCash • Stripe Connect • IEEE 29148 • ISO/IEC 25010 • UAT coordination • ClickUp

EDUCATION

Mabini Colleges, Inc. | BS Computer Science *Graduated 2025*
Project Manager & System Architect on multiple real-client software engineering projects.
